Syed Madanin Shoaib

Final-Year Computer Science Engineering Student
Bangarpet, Karnataka | +91 9611748087 | syedshoaib22a@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student with hands-on experience building and deploying web applications, including a Firebase-backed platform built with AI-assisted development, and collaborating on a national-level hackathon prototype for email threat detection. Strong foundation in object-oriented programming, with Java, JavaScript, and data structures as active areas of growth, and a genuine interest in applying AI to real engineering problems.

EDUCATION

Dr. T. Thimmaiah Institute of Technology (VTU) — Bangarpet, Karnataka
Bachelor of Engineering, Computer Science & Engineering — Final Year (7th Semester), Expected 2027
CGPA: 7.57 | Class XII: 78.17% | Class X: 76.8%

TECHNICAL SKILLS

Languages: Java, Python, C, C++
Web Technologies: HTML5, CSS3, Responsive Web Design
Cloud & Database: Firebase Authentication, Cloud Firestore
Security & Forensics: Email Authentication (SPF/DKIM/DMARC), Digital Forensics Fundamentals
Developer Tools: Git, GitHub, Netlify, VS Code
Core Computer Science: Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks
Learning: JavaScript, Data Structures & Algorithms, Software Engineering Principles

RELEVANT COURSEWORK

Object-Oriented Programming | Database Management Systems | Operating Systems | Computer Networks | Data Structures & Algorithms

PROJECTS

AI-Powered Email Threat Detection & Forensic Intelligence Platform — Smart India Hackathon 2026 (Team Project)
Python, FastAPI, React.js, XGBoost, DistilRoBERTa, SPF/DKIM/DMARC

- Built the email parsing and forensic-analysis module of a prototype threat detection platform for Smart India Hackathon 2026 (Problem Statement SIH26106, Theme: Blockchain & Cybersecurity), developed with a 4-member team.
- Parsed uploaded .eml files using Python's email library to extract sender, receiver, Reply-To, Return-Path, Message-ID, SPF/DKIM/DMARC authentication results, routing hops, URLs, and attachments.
- Generated structured forensic reports dynamically from actual parsed email content rather than static or hardcoded values.
- Integrated the team's detection, forensic, and reporting modules into a working end-to-end demo under a tight hackathon timeline, collaborating with teammates responsible for AI-based threat detection and model training.

QR-Based Restaurant Ordering Platform
Live Demo | Source Code | HTML, CSS, JavaScript, Firebase Authentication, Cloud Firestore, Netlify

- Designed a QR-based restaurant ordering platform, using AI-assisted development to build a JavaScript and Firebase-based system that stores its live menu in Cloud Firestore, letting customers browse the menu, place orders, and track real-time order status through a responsive web interface.
- Designed separate owner and customer dashboards on Cloud Firestore, giving each side a dedicated view for managing and browsing the menu.
- Implemented real-time order status synchronization using Cloud Firestore listeners, allowing customers and owners to receive live updates without refreshing the application.
- Implemented Firebase Authentication and Firestore security rules to restrict write access to authenticated owners, protecting menu and order data while keeping live listings readable to customers.

STEGCRYPTO – Hybrid Cryptography & Steganography System (Team Project)
Python, Flask, PBKDF2-HMAC-SHA256, Fernet, BLAKE2b

- Contributed to a 4-member team project building HCCS, a hybrid cryptography and steganography system that conceals encrypted text and images within cover images using LSB embedding, PBKDF2-HMAC-SHA256/Fernet encryption, and BLAKE2b-based nibble masking, with a steganalysis module to estimate the likelihood of hidden data.

PUBLICATIONS

- Co-author, "AI Enabled Smart Personal Diary System with Voice Recording and Intelligent Alerts for Offline Mobile Application," IEEE-formatted research paper, Dept. of CSE, Dr. TTIT, KGF (2025–26).

CERTIFICATIONS

- Infosys Springboard — DevOps Fundamentals
- Intel — AI For All
- be10x — AI Tools & ChatGPT Workshop

LANGUAGES

English, Hindi, Urdu, Kannada
